OFFER AS OWNERS THE FOLLOWING:-**

Blast deflector sale – Airport ground equipment

Aircraft blast deflector “Lynnco Type G-14M-3 Blast Deflector” manufactured AUG/SEPT 1997 by Blast Deflectors Inc., California, USA

Consisting of two sides, one side approx 117 ft. the other approx 102 ft both have a nominal height of 14 ft. Designed to withstand loads of 300 P.S.F. or 340 M.P.H. They are joined together to form an open Vee shape (see photo). They can be sold individually - lengths as noted, or as the complete unit.

The blast deflector has now been dismantled and all components, (support structure as well as the corrugated sheet cladding) was found to be in an excellent condition, due to the heavy hot dipped zink coating, that was applied during manufacture. All items are presently located on our Company Site - South Humberside, United Kingdom.

Any potential bidder/buyer will be responsible for parts purchased to be removed from present location, at their own expense.
